

# Mental Accounting in College: Students and 'Free Money'

Connor Woods

April 2, 2020

Importing FLEX data:

```
flex_data <- read_csv("flex_data.csv")
head(flex_data)
```

```
## # A tibble: 6 x 5
##   `POS Name`      Date    Time      `Tender Name` Price
##   <chr>          <chr>   <chr>      <chr>      <dbl>
## 1 POM Coop Store 1/21/19 1/22/19 11:18 Board Plus      3.8
## 2 POM Coop Store 1/21/19 1/21/19 11:36 Board Plus      2.5
## 3 POM Coop Store 1/21/19 1/21/19 11:47 Board Plus      3.5
## 4 POM Coop Store 1/21/19 1/21/19 11:51 Board Plus       4
## 5 POM Coop Store 1/21/19 1/21/19 11:51 Board Plus     8.1
## 6 POM Coop Store 1/21/19 1/21/19 11:59 Board Plus     8.7
```

```
ggplot(flex_data, aes(x=Date, y=Price)) + geom_point()
```
